TREE PLANTING
Why Plant Trees?

- Trees filter pollutants out of our drinking water and clean the air we breathe.
- Trees shade our homes, businesses, streets, and sidewalks, cooling the areas around them by up to 10 degrees.
- Tree canopies serve as a sound barrier, reducing traffic noise in urban areas by 40-50%.
- Tree roots help secure soil, preventing erosion and lessening the impact of flooding.
- Spending time in tree-filled areas helps us improve our mental and physical health.
